## EXHIBIT A PENDING CLAIMS APPLICATION NO. 08/799,910 DOCKET NO. 7853-067 (As Amended under 37 C.F.R. § 1.116, August 9, 2001)

- 103. (Amended) An isolated polynucleotide comprising nucleotides 211-468 of the fchd605 nucleotide sequence set forth in SEQ ID NO: 9, wherein said isolated polynucleotide encodes at least amino acids 71-157 of the fchd605 polypeptide depicted in SEQ ID NO:10, and wherein said fchd605 polypeptide is upregulated in monocytes under conditions of oxidized LDL treatment.
- 104. An isolated polynucleotide consisting of nucleotides 211-468 of the fchd605 nucleotide sequence set forth in SEQ ID NO: 9.
- 105. (Amended) An isolated polynucleotide which hybridizes under highly stringent hybridization conditions to the polynucleotide of claim 104, wherein said highly stringent hybridization conditions comprise hybridization in 0.5 M NaHPO<sub>4</sub>, 7% sodium dodecyl sulfate (SDS), 1 mM EDTA at 65°C, and washing in 0.1xSSC/0.1% SDS at 68°C, wherein said isolated polynucleotide encodes an fchd605 polypeptide which is upregulated in monocytes under conditions of oxidized LDL treatment.
- 106. (Amended) A polynucleotide vector comprising the isolated polynucleotide of claims 103, 104, or 105.
- 107. (Amended) A cultured genetically engineered host cell comprising the vector of claim 106.
- 108. (Amended) The isolated polynucleotide of Claim 103, 104, or 105 which is DNA.
  - 109. (Amended) The isolated polynucleotide of Claim 108 which is cDNA.
- 110. (Amended) The isolated polynucleotide of Claim 103, 104, or 105 which is RNA.
- 111. (Amended) The isolated polynucleotide of Claim 103, 104, or 105 which further comprises a label.
- 112. (Amended) A polynucleotide expression vector containing the polynucleotide of Claim 103, 104, or 105 in operative association with a nucleotide regulatory element that controls expression of the polynucleotide in a host cell.
- 113. (Amended) A cultured genetically engineered host cell containing the polynucleotide of Claim 103, 104, or 105.

- 114. (Amended) A cultured genetically engineered host cell containing the polynucleotide of Claim 103, 104, or 105 in operative association with a nucleotide regulatory element.
- 115. (Amended) A method of producing the polypeptide encoded by the polynucleotide of Claim 103, 104, or 105, comprising the steps of:
  - (a) growing a genetically engineered host cell containing said polynucleotide in a culture; and
  - (b) collecting the polypeptide gene product from the culture.
  - 116. The method of Claim 115 in which the host cell is prokaryotic.
  - 117. The method of Claim 115 in which the host cell is eukaryotic.
